BRUT-33	8		
BRUT-11	8		
BRUT-3	5		*
BRUT-20	8	BRUT-3	*
BRUT-4	3	BRUT-20	*
BRUT-57	5	BRUT-20	*
BRUT-2	8	BRUT-57	*

During this sprint, we planned bi-weekly meetings to ensure implementation of all stories were on track.

During planning for sprint 3, we dedicated ourselves to implementing BRUT-2 which has an extensive list of prerequisite dependencies. With this in mind, we decided to label BRUT-33 as a stretch goal.

The difference between our expected schedule and the actual schedule that happened during sprint 3, taught us that in sprints with many dependencies it's best to start early. It is also important to have good communication between assignees of tickets that are prerequisite to other team members.
